I think Microsoft has been delt with by the courts and the Federal & State Governments in a grossly improper way. Microsoft has helped the development of this country in a way that no private company has ever done before in our history. The government agencies and other companies that are bringing suit (AOL T/W etc.) are a bunch of crybabies who are looking for a chance to get something from Mr. Gates' company that they have no right to. Lets recognize Microsoft's achievements and stop persecuting them.
